

# HEIBOFOL Tobacco foil

HEIBOFOL tobacco foil is an outstanding product for the manufacture of little cigars or cigarette-like products with or without filter tip. It can be processed on all medium speed cigarette making machines instead of the usual cigarette paper.

## HEIBOFOL-Advantages:

- High tensile strength and general stability
- Better taste and elegant look of the finished product
- At a tobacco contents of more than 75% in its dry weight HEIBOFOL complies with the German Tobacco Regulations and is considered to be equivalent to tobacco
- Color, taste and general appearance are governed by the formulation of the tobacco coat used or by the treatment with flavor or other additives.

## Technical Data:

Width of cut	> 26 mm (adjustable)
Thickness	below 0,1 mm
Tensile strength	Approx. 1,5 kg
Humidity	Approx. 13%
Weight	70 - 84 g/m <sup>2</sup>
Tobacco content	> 75%
Length of the bobbins	1.500 – 1.800 m
Diameter of the bobbins	Approx. 400 mm
Diameter of core	76 or 120 mm

These figures, e.g. weight, width of cut etc. can be modified slightly to meet special requirements. Please ask for samples and technical advice.
